WORK EXPERIENCE

Frontend Developer – Adnexio Ecosystem | *Nov 2024 – Aug 2025*

Adnexio Jobs
- Migrated legacy React app to Next.js, enabling server-side rendering and performance improvements
- Standardized UI components across 4 internal products for consistent UX

Adnexio Edu (Course Admin)
- Led a small frontend/backend team to integrate Next.js with custom APIs
- Executed UAT and resolved 50+ bugs to meet full specification compliance

Brand Page Revamp
- Rebranded visual assets to reflect new corporate identity
- Achieved 30% faster TTFB through asset optimization

Adnexio HR (with INVOKE Solutions)
- Created 15+ reusable components, reducing dev time by 25%
- Delivered Attendance Admin module handling 1,000+ daily records
- Revamped public-facing site, improving Lighthouse score from 65 to 90

Frontend Developer – PactOnline | *Dec 2024 – Jul 2025*
- Refactored Will Generator module to accommodate evolving client requirements
- Enhanced form flow and Stripe payment integration in collaboration with backend team
- Optimized media assets for faster load times and improved Lighthouse performance

Frontend Developer – RocketBusiness | *Dec 2023 – Jul 2024*
- Integrated Directus CMS, cutting content update cycle time by 40%
- Built real-time features with Socket.IO and Node.js supporting 500+ concurrent users

- Created internal documentation to streamline developer onboarding

Frontend Developer – RocketRewards | *Feb 2024 – Apr 2024*
- Connected Directus CMS for client-side copy updates
- Integrated PulseID service to dynamically fetch and render latest promotions

Frontend Developer – Parkson Credit | *Dec 2024 – Mar 2025*
- Developed a dynamic landing page using Next.js and Directus CMS
- Implemented code-splitting and performance optimizations for 20% faster page load

Frontend Developer – Decoris.agy | *Aug 2024 – Dec 2024*
- Refactored frontend user flows based on updated wireframes
- Fixed critical bugs, raising post-release satisfaction from 3.8 to 4.5 out of 5

PROJECTS

cyphr.my - Responsive Portfolio Site
- Designed personal site with React, Payload CMS and Tailwind CSS
- Set up backend using Postgres and asset storage using Vercel Blob storage
- Showcased key projects and GitHub integrations

Autominder - Fullstack Web App
- Developed using React, Tailwind CSS, Node.js, Express.js, and PostgreSQL
- Implemented secure API endpoints, form validation, and CRUD functionality
- Structured backend logic using modular Express routes and PostgreSQL queries
- Demonstrated frontend-backend integration and state management

---

EDUCATIONS & CERTIFICATIONS

Adnexio Software Engineering Bootcamp – Fullstack Web Development
Oct 2023 – Mar 2024

Bachelor of Engineering (Hons), Mechanical – Taylor's University
2013 – 2017

ADDITIONAL INFORMATION

Languages: English, Malay
Availability: September 2025
Interests: Web app innovation, AI tooling
